OBJECTIVE

Seeking Lead Automation Testing Engineer role where I can apply 11 years of experience in quality strategy, scalable UI, API, QA mentorship, and CI/CD integration. I aim to drive engineering excellence through AI-assisted quality engineering using GitHub Copilot, custom Copilot Agents, and MCP servers to accelerate test generation, strengthen release confidence, and improve enterprise quality standards.

CAREER SUMMARY

- Over 10 years of professional experience in software testing, architecting scalable automation frameworks, and CI/CD pipelines for mission-critical enterprise domains.
- Proven track record with extensive hands-on expertise in end-to-end automation utilizing Java, Selenium, RestAssured, Apache HttpClient, Playwright, and Cucumber (BDD).
- Pioneering AI-led quality engineering by leveraging GitHub Copilot, custom Copilot Chat Modes, Claude Code, and Model Context Protocol (MCP) servers to accelerate test generation, automate Kafka message payloads, and streamline code reviews.
- Working knowledge of cloud platforms and distributed architectures including Microsoft Azure, Amazon Web Services (AWS), and Apache Kafka event-driven systems.
- Demonstrated comprehensive expertise in Agile methodologies, Scrum framework, and Software Development & Testing Life Cycles (SDLC and STLC).
- Actively contributes to Agile ceremonies including daily stand-ups, sprint planning, backlog refinement, demos, and sprint retrospectives.

TECHNICAL SKILLS

Languages:	Java, TypeScript, C#, Elixir
Framework & Libraries:	Selenium WebDriver, Cucumber BDD, RestAssured, Apache HttpClient, Playwright, TestNG, Junit, Phoenix (MVC)
AI Tools & Agents:	GitHub Copilot, Antigravity, Claude Code, MCP Servers
Build & CI/CD Tools:	Maven, Gradle, Jenkins, GitLab CI/CD, GitHub Actions
Version Control Tools:	Git, GitHub, GitLab, Bitbucket
Databases:	PostgreSQL, T-SQL (Microsoft SQL Server)
Project / Test Management:	Jira, Jira Xray, Confluence, Redmine, Bugzilla, TestLink
Operating Systems:	Ubuntu Linux, Windows 10/11

CERTIFICATION CREDENTIALS

- [GitHub Copilot Certified \(GH-300\)](#)
- [GitHub Actions Certified \(GH-200\)](#)
- [GitHub Foundation Certified \(GH-900\)](#)
- [Google Cloud Certified Generative AI Leader \(GCP-GAIL\)](#)
- [Microsoft Certified Azure Data Fundamentals \(DP-900\)](#)
- [Microsoft Certified Azure Fundamentals \(AZ-900\)](#)
- [Postman API Fundamentals Student Expert Certified](#)

PROJECTS HANDLED

1. Tata Consultancy Services (January 2025 to Present) - IT Analyst

Project: Capital Market - Investment Accounting **Client:** USA

Framework: Event-Driven BDD Automation (Cucumber, Kafka, Oracle DB Assertions) **Language:** Java

Description:

Validating a mission-critical investment accounting platform managing the complete **front- office to back-office trade lifecycle**. Core operations focus on ensuring accurate daily **portfolio valuation**, automated processing of complex **corporate actions** (dividend distributions), and data integrity validation across global asset classes (**equities, fixed income, derivatives, money market funds**) for regulatory compliance.

Project Structure:

Operates on 2-week Agile sprints using Jira with Xray plugin for test management and Confluence for sprint analytics. Engineered an event-driven automation framework in Java bypassing untestable UI by injecting and consuming Apache Kafka events for portfolio creation and securities processing. Page Object Model (POM) principles maintain message payloads, DB connectors, and Excel-based assertions against Oracle SQL database records. Automated regression execution is fully integrated with Jenkins CI/CD and GitHub.

AI-Led Automation Initiatives:

- Agent to generate and export Cucumber test scripts into CSV format for Jira Xray upload.
- Agent to scaffold new test scripts automatically conforming to BDD conventions.
- Agent to validate and enforce Cucumber format-based coding guidelines in test scripts.
- Agent to validate and generate Apache Kafka messages leveraging **custom skills (Portfolio.SKILL, FixedIncome.SKILL)**.
- Agent to perform automated code reviews based on custom team instructions and enterprise standards.

IMPACT:

Boosted overall **automation efficiency by up to 40%** by eliminating manual boilerplate, automating Jira Xray synchronization, instantly generating complex Kafka payloads, and enforcing strict governance through automated Copilot code reviews.

Responsibilities:

- Led and mentored QA automation engineers throughout all phases of the project lifecycle.
- Optimized engineering productivity by embedding GitHub Copilot into daily test development workflows.
- Collaborated closely with Product Owners and Business Analysts to define acceptance criteria and map test scenarios directly to UAT goals.
- Oversee defect tracking and reporting processes in Jira to improve communication transparency and timely resolution.
- Maintained codebase integrity through rigorous code reviews and PR approvals in Git and GitHub.
- Presented critical test metrics, automation coverage, and defect trends to stakeholders in weekly reviews.

- Streamlined onboarding of new engineers by conducting technical and domain-specific knowledge transfer sessions.

2. Tata Consultancy Services (February 2022 to December 2024) - IT Analyst

Project: Capital Market - Alternative Investment **Client:** USA

Framework: Selenium (Page Object Model), Cucumber BDD, SSRS Reporting Tests **Language:** Java

Description:

Focused on a middle-office Alternative Investment platform designed to manage and track non-traditional asset classes (private equity, hedge funds, real estate, commodities, venture capital). The system features dual architecture: a core web application for portfolio management and an SSRS application for downstream financial reporting and data extraction.

Project Structure:

Engineered an end-to-end Cucumber BDD automation framework from scratch using Java to validate workflows across Web UI, backend database tables, and SSRS reporting portals. Selenium WebDriver adheres strictly to POM design pattern for page classes and utilities. Leveraged Excel files for data-driven backend assertions, with build lifecycle managed via Apache Maven and CI execution handled via Jenkins with GitHub.

Responsibilities:

- Provided leadership and mentorship to test automation team members throughout all project phases.
- Created a robust automation test framework with Cucumber, Selenium, and Java to enhance testing efficiency.
- Conducted detailed code reviews and managed pull requests in GitHub, ensuring high code quality and standards.
- Identified, logged, and tracked defects in Jira discovered during sprint and regression test runs.
- Presented key test results, coverage metrics, and defect trends to stakeholders in weekly review meetings.
- Collaborated with Product Owners, BAs, and developers to define test scripts aligning with acceptance criteria.
- Facilitated comprehensive knowledge transfer workshops for smooth team onboarding and domain enablement.

3. Bebo Technologies Pvt. Ltd. (Oct 2019 to Feb 2022) - Module Lead (Test Automation)

Project: Library Management System **Client:** US and European Libraries

Framework: Selenium (Page Object Model), API Tests (Apache HttpClient) **Language:** Java

Description:

Developed and tested a comprehensive Library Management System designed to streamline operations such as book cataloging, user registration, check-in/check-out, fine calculations, and inventory management for digital and physical records.

Project Structure:

Maintained multi-module automation frameworks for web browser automation using Selenium (Java) and API testing using Apache HttpClient libraries. Dependencies and multi-project executions were managed using Gradle build scripts. Test execution was automated across multiple Jenkins agent nodes using Selenium Hub for parallel runs on Chrome and Firefox.

Responsibilities:

- Led and mentored team members, providing technical guidance to resolve framework and execution bottlenecks.
- Collaborated with offshore client teams to ensure transparent communication and milestone alignment.
- Managed defect reporting and tracking lifecycles to reduce delays and enhance resolution speed.
- Developed and maintained automated test scripts and regression suite to uncover system breakages.
- Involved in prioritizing test scripts and suites for automation pipeline integration.

4. Watermark Insights India Pvt. Ltd. (September 2015 to October 2019) – SDET

Project: Planning & Education Assessment System **Client:** American Universities

Framework: Phoenix MVC Framework, Selenium (Page Object Model), ExUnit **Language:** Elixir, Core Java

Description:

Provided assessment and planning solutions to higher education institutions, helping universities maintain accreditation standards, track annual organizational goals, and generate actionable compliance reports.

Project Structure:

The primary application utilized Phoenix MVC in Elixir. Authored integration test scripts with the ExUnit library executing during compile time and on commits via GitLab CI/CD pipelines. UI smoke test automation was developed in Core Java using Selenium and TestNG structured around Page Object Model, managed with Maven and scheduled via Jenkins timer triggers.

Responsibilities:

- Improved smoke test coverage by automating UI test scripts using Selenium and TestNG in Java.
- Authored backend integration test cases using ExUnit in Elixir.
- Participated actively in identifying, reporting, and tracking functional and design defects.
- Logged and tracked defects across Jira, Redmine, and Bugzilla to minimize resolution delays.
- Prepared and executed manual and automated test cases during sprint cycles to uncover breakages.
- Assisted cross-functional team members and maintained up-to-date requirements traceability reports.

ACADEMIC CREDENTIALS

Professional Qualification:

- B.Tech. (CSE) from Shoolini University, Solan (H.P.) with OCPA 7.14 (2015)
- Diploma (CSE) from Govt. Polytechnic Kangra (H.P.) with 62.83% (2011)

Qualification:

- Senior Secondary from HP Board of School Education in Arts with 60.2% (2012)
- Matriculation from HP Board of School Education with 82.7% (2008)

PERSONAL SNIPPETS

Father's Name: Mr. Raj Kumar
Date of Birth: 16 August 1993
Residential Address: V.P.O. Seoh Tehsil Sarkaghat Distt. Mandi (H.P.)
Gender: Male
Languages Known: English, Hindi
Social: **LinkedIn:** [linkedin.com/in/shubham160893](https://www.linkedin.com/in/shubham160893),
